THIS IS A STANDALONE. From birth until her early teenage years, Braelynn "Brae" Crowley, had known nothing but abuse and heartache. Walking around with her head down, and self-esteem low, was normal for Braelynn, until one night changed her dramatically. Trying to move forward and deal with the pain at an early age was hard, causing her to do something drastic. After recovering, she begins to get to gain confidence she never thought she could have. Omega "Mega" Kingsley had always been reckless since diapers. Always having a security blanket in someone close to him, until they're taken away. Then, Omega turns ice cold, and changes his ways quickly. Always being sought after because of his looks and pockets, he tries to remain loyal to someone who didn't know the meaning of loyalty. Finally saying enough was enough, Omega walks away from it all, but something pulled him back, and he had no choice but to return. After encountering each other's presence once, they were sure they would have a permanent spot in each other's chaotic lives. But life has a tendency of making things difficult, when it could all be so simple. Will Braelynn and Omega be able to endure the problems that come their way, or will it be too much for someone, causing them to call it quits?
