Liberty Heart and Legacy Royal have been through it all in the process of going from friends to lovers. Finally, all is right in their world, and the only thing they have to worry about is planning their wedding... or so they thought. Just when they figured nothing could go wrong with only days left before the wedding, blasts from their past causes doubt within them both. Quan and Ginger Heart have been living their best married lives with no friction or major issues other than the usual marital spats. However, when Liberty asks them to open their home to family for a few days before the wedding, it quickly causes drama in their household that they clearly saw coming. Wanting to appease the bride and groom to be, they try their best to accommodate everyone... even if it means possibly putting their solid marriage at risk. Follow the Hearts and Royals—two big, crazy families—as they come together to join two persons as one... if they make it to the altar.
