

**CONTINUE ►**

In 1887, with the view of amplifying and completing certain new doctrines which he had merely sketched in *Beyond Good and Evil*, Nietzsche published *The Genealogy of Morals*. This work is perhaps the least aphoristic, in form, of all Nietzsche's productions. For analytical power, more especially in those parts where Nietzsche examines the ascetic ideal, *The Genealogy of Morals* is unequaled by any other of his works; and, in the light which it throws upon the attitude of the Ecclesiastes to the man of resentment and misfortune, it is one of the most valuable contributions to sacerdotal psychology.
