CONTINUE ►

In order to learn, kids need to move! Grounded in best practices and current research, this hands-on resource connects the dots that link brain activity, movement, and early learning. The expert authors unveil the Kinetic Scale: a visual map of the active learning needs of infants, toddlers, preschoolers, and primary graders that fits each child's individual timetable. Teachers, parents, and caregivers will find a wealth of information, actionable tips, and games they can use to support children's healthy development. All presented in a lively, full-color format with demonstrative diagrams and photos. A final section offers easy-to-implement activities geared to the Kinetic Scale. Downloadable digital content includes printable charts, games, and activities from the book plus a PowerPoint presentation for professional development, parent handouts, and bonus activities. An ideal tool for coaches, mentors, and trainers. Introducing the Kinetic Scale
