

## [GET] A Theory of Human Need

**CONTINUE ►**

Rejecting fashionable subjectivist and cultural relativist approaches, this important book argues that human beings have universal and objective needs for health and autonomy and a right to their optimal satisfaction. The authors develop a system of social indicators to show what such optimization would mean in practice and assess the records of a wide range of developed and underdeveloped economies in meeting their citizens' needs DISCLAIMER: "We cannot guarantee the availability of this ebook on an external site."
