The most comprehensive book on the market, Herb Zettl's **SIGHT SOUND MOTION: APPLIED MEDIA AESTHETICS**, 8e describes the major aesthetic image elements -- light and color, space, time-motion, and sound -- as well as presents in-depth coverage on how they are creatively used in television and film. Zettl's thorough coverage of aesthetic theory and the application of that theory place this contemporary and highly relevant text in a class by itself. It equips students to think critically about media aesthetics and apply them to production situations. Richly illustrated and now presented in full color, it also features strong visuals that often draw on traditional art forms, such as painting, sculpture, and dance. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
