For years student pharmacists have jerry-built a pocket-sized collection of figures and tables containing key clinical information they look up frequently. Many graduates carry their tattered resource along with them right into practice. Peripheral Brain for the Pharmacist, APhA's new 2018-2019 edition, includes more than 90 individual core reference pages including new content on calculations; immunization schedules for infants to adults; travel health immunizations; and updates based on the most recent changes in guidelines on diabetes, hypertension, cholesterol, and warfarin management. This new edition also features an easy-to-use spiral binding. Reference materials include: ASCVD Risk Assessment, Hypertension Management, Oral & Injectable Anticoagulants, Diabetes Treatment, Asthma & COPD Guidelines, Antibiotic Dosing, Special Populations, Topics, Immunization Schedules, Helpful Equations, Normal Lab Values, Creatinine Clearance, Opioid & Steroid Conversions, Pharmacists Patient Care Process, Significant Drug Interactions, Drug Withdrawal, Nutrition.
