Philosophers and theologians have long engaged in intense debate and introspection over the representation of the deity, its possibilities and its proscriptions. The Forbidden Image traces the dual strains of “iconophilia” and iconoclasm, the privileging and prohibition of religious images, over a span of two and a half millennia in the West. Alain Besançon's work begins with a comprehensive examination of the status of the image in Greek, Judaic, Islamic, and Christian thought. The author then addresses arguments regarding the moral authority of the image in European Christianity from the medieval through the early modern periods. Besançon completes The Forbidden Image with an examination of how iconophilia and iconoclasm have been debated in the modern period. “Even the reader who has heard something of the Byzantine quarrels about images and their theological background will be surprised by a learned and convincing interpretation of the works of Mondrian, Kandinsky, and Malevich in terms of religiously inspired iconoclasm. . . . This is an immensely rich and powerful masterpiece.”—Leszek Kolakowski, Times Literary Supplement
