

# HIdvM [Download] Grand Canyon Trail Map 5th Edition

CONTINUE ►

Beautiful, accurate, very detailed and best selling Grand Canyon map is now available in the 5th edition. Local favorite. Waterproof and Tear Tough. Fine shaded relief and 100ft contours give a detailed & stunning view of the Canyon topography. Mileage info to all trail junctions, plus cumulative mileage for select segments. Includes trail profile graphs. Thoroughly reviewed by Park Rangers. Detailed topographic trail map of 308,000 acres in central Grand Canyon. 1:40,000 scale covers 8 USGS quads. 308 miles (495km) of trails shown with trail ratings, text descriptions & statistics. Most complete & accurate map of the area. Includes 100ft contours, shaded relief, UTM grid for use with GPS, hydrology with springs & drinking water (including a chart), backcountry use zones for permit planning, and other trip information. Printed on waterproof, tear-tough paper. This map covers the huge core of Grand Canyon National Park. This is the area where 99% of visitors travel and where 90% of overnight backcountry trips take place, and where most trails and reliable water sources are. The map does not cover the vast and more isolated western sections, nor the far NE corner. (Zoom into the inset maps above to see exact coverage.) Includes a handy and concise bus map. All in all this is a very useful and legible map. Hope you like the new edition!
