The long-awaited third installment in Theodore Gray's iconic "Elements" trilogy. The first two titles, *Elements* and *Molecules*, have sold more than 1.5 million copies worldwide. With *Reactions* bestselling author Theodore Gray continues the journey through our molecular and chemical world that began with the tour de force *The Elements* and continued with *Molecules*. In *The Elements*, Gray gave us a never-before-seen, mesmerizing photographic view of the 118 elements in the periodic table. In *Molecules*, with the same phenomenal photographic acumen, plus beautifully rendered computer generated graphics, he showed us how the elements combine to form the content that makes up our universe, from table salt to oxygen to the panoply of colors and smells that surround us.
