"Would give me a great deal of relief if you would eat something, my lady." "Is it poisoned?" "Not yet, but I could call down to the kitchens if you'd prefer it to be." If I had to pick a bride of convenience, my first choice would NOT be Peach Maloney. My fiftieth choice would NOT be Peach. Top spot on my list of occupational hazards? Yes. Royal pain in the crumpets? Yes. A bride of convenience? No. But I've unexpectedly gone from royal bodyguard to monarch, having inherited a crown that was stolen from my family long before my birth. The kicker of this unexpected royal gift? In order to take the throne I must find a wife. Have I mentioned Peach would NOT have been my hundredth choice? But I've no other options, and she needs a favor that my new position can fulfill quite nicely. So we've agreed to play the doting newlyweds out in public. In private, though, our rules are simple: No touching. No talking. And certainly no sex. I should have known better than to marry a rule-breaker. Hot Heir is a romping fun marriage of convenience romance between a surprise heir and a southern hot mess, complete with the bedroom to end all bedrooms, a run-down alpaca, and that thing with the hot air balloon. This romantic comedy stands alone with no cheating, cliffhangers and ends with a royally awesome happily ever after.
