Iran wants to be the master of the Mideast. It's threatening war with Saudi Arabia. It's supporting wars in Iraq, Syria and Yemen. It's supporting the Lebanon terror army Hezbollah to wage war in Syria and to attack and eliminate Israel, and to attack the United States. This book describes how a former United States ally has turned into a radical, corrupt, theological regime threatening the entire region. This book also addresses the controversies in Islam itself, including the Sunni-Shia split, the authenticity of the Koran and Sharia Law, polygamy and pedophilia in Islam, and whether the Koran commands all Muslims to kill all non-Muslims. "A must read to understand the complexity of political Islam." -- Loretta Napoleoni author of *ISIS, The Terror Nation* About the author: John J. Xenakis is a historian, journalist and analyst and a developer of generational theory, who has written prolifically on geopolitical events, historical analysis, and technology.
