The end of the world is the weirdest time to come of age. Welcome to the end of the world. One minute, people are going about their lives, and the next not. In the wake of the inexplicable purge, only a handful of young misfits remains. When it all went down, Wizard of Odd Dev Brinkman was seeking shelter from the taunts of his classmates. Goth girl Lucy Abernathy had lost her best friend and had no clue where to turn. And Twinkie-loving quarterback Marcus Haddad was learning why you never discuss politics and religion in polite company or online. As if life when you're sixteen isn't confusing enough, throw in the challenges of postapocalyptic subsistence, a case of survivors' guilt turned up to seven billion, and the small task of rebuilding humankind. No one said doomsday would be a breeze. But for Dev, Lucy, and Marcus, the greatest hope and greatest threat will come when they find each other.
