

[GET] A Photographic Atlas for Anatomy & Physiology

CONTINUE ►

For 2-semester A&P lab course and 1-semester human anatomy lab course A Photographic Atlas for Anatomy & Physiology is a new visual lab study tool that helps students learn and identify key anatomical structures. Featuring photos from Practice Anatomy Lab 3.1 and other sources, the Atlas includes over 250 cadaver dissection photos, histology photomicrographs, and cat dissection photos plus over 50 photos of anatomical models from leading manufacturers such as 3B Scientific, SOMSO, and Denoyer-Geppert Science Company. Two-page spreads with cadaver and anatomical model photos side-by-side help students to better learn and identify structures. The Atlas is composed of 13 chapters, organized by body system, and includes a final chapter with cat dissection photos. In each chapter, students will first explore gross anatomy, as seen on cadavers and anatomical models, and then conclude with relevant histological images.
