Helping kids master multiplication is so important! It relates to learning division, percentages & algebra basics & it's essential for calculations like tripling recipes, planning travel times/mileage, or finding square footage. Understanding properties of multiplication and the ability to multiply are Common Core third-grade objectives. Multiplication 0-12 Flash Cards include 55 cards (110 problems) to help teach and reinforce multiplication skills for a solid math foundation. A Parent Card has tips to extend the lessons. Practice locking in 1 s, 12 s & all numbers in between, one factor at a time. For easy self-correction, at the bottom of each side of the card is the answer to the problem on the reverse side. Get ready for timed tests! Speed, focus, motivation & memorization all tend to improve with flash card drills. Use for self-paced learning in school and homeschool classrooms, or compete with a friend. The convenient storage box & size makes them perfect for taking anywhere. Kids and parents who use our flash cards for practice testing are using one of the most effective learning techniques available. A hundred years of research shows practice testing is highly likely to boost retention. They offer a fun, fast, easy, time-tested way to memorize new information and apply important concepts. Flash cards help with active recall activity stimulating memory during the learning process instead of passively recalling it later on. Reviewing information again and again at spaced intervals helps reinforce it and builds and strengthens memory and memory pathways. Flash cards also offer great possibilities for parents working together with kids, and kids working with friends and siblings. School Zone flash cards offer big learning power packed with near-endless possibilities. An enthusiastic teacher gave 5 stars to Multiplication Flash Cards 0-12! Parents know that flash cards offer tried-and-true learning, and playing games with the cards or offering rewards for improved speed and accuracy can add to the pleasure and incentive. Go through the set one at a time or focus on just threes (or any other number!). Get kids ready for that next test, and make it fun! Help tune up your child's multiplication skills for speed and accuracy. Math speed drills take place in almost every school so help get your child on the fast track to positive test scores. Build understanding of factors, multiples, and products. Your child can sharpen math skills by working individually or with a friend, gaining efficiency and proficiency. Developing math skills can be challenging. Multiplication Flash Cards 0-12 will help your child relax and enjoy the learning process during third and fourth grade. Tuck them into a backpack, tote bag, or carry-on bag, and pull them for more productive wait times. Clean-up and storage are easy.
