Two powerful men. A fragile woman. One dark path. With each step forward, Colin, Anthony, and Sydney built an unbreakable bond that gave them courage and strength. The road was littered with heartbreak, obstacles, and an unexpected element that only made them more committed...love. Nothing can break apart what they've built. They're committed to each other and the life they've created for themselves. But can the same road that brought them so close also draw them apart? Not all roads have room for three. Some can only fit two—and some are meant to be walked alone. It was never about the end...it was always about their journey.\*This book contains content not suitable for those under 18.
