Provides information that will help the average person prepare for the uncontrollable forces and events that will affect everyone on the planet within the next 20 years. A user friendly 'bible' in the tradition of the Whole Earth Catalogue, this book is the first to offer basic instructions and recommended resources for the wide range of skills and technologies necessary for self-reliant living and achieving mastery of all kinds of emergency conditions. A directory of resources and an instructional guide to sustainable technology required in an increasingly unstable world, it outlines survival strategies for dealing with changes that affect food, water, shelter, energy, health, communications, and essential goods and services.
