National Geographic's World map is the standard by which all other reference maps are measured. The World map is meticulously researched and adheres to National Geographic's convention of making independent, apolitical decisions based on extensive research using multiple authoritative source. The Executive style World map uses an antique-style color palette and stunning shaded relief that provide a richness perfect for any decor. Drawn in the Winkler Tripel projection, distortions are minimized and unlike many other World maps, Greenland is show the same size as Argentina and not as the size of all of South America. Thousands of place names are carefully and artistically placed on the map to maintain legibility even in the heavily populated ares of Europe, Asia and the Middle East. Details include clearly defined international boundaries, cities, physical features, rivers, and ocean floor features. Corner inset maps feature vegetation and land use, and population density as well as the north and south polar regions. Poster sized maps make a perfect addition to any sized space. They are specially designed to maximize content in a smaller footprint than standard wall maps and fit precisely

into precut poster sized frames which makes finishing and hanging them a breeze. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:37,215,000 Sheet Size = 36" x 24"
