One moment can change everything...One bullet.One car accident.One chance to start over.I was a SEAL... With one bullet to the shoulder, my life as I knew it changed. I was no longer in the Navy. I was no longer sure of my future. I lost function to the most important thing as a sniper—my trigger finger. I felt useless—until one call from The Brotherhood Protectors.That one call brought me a new job, renewed purpose, and straight to her doorstep.Abigail Montana and her beautiful little girl. Instantly, I had a reason to breathe and look forward to tomorrow. Though, as I've learned, all it takes is one moment for everything to change. They could both be my future, if I can rescue Montana from her past.
