

[Free PDF File] First Survivor: The Impossible Childhood Cancer Breakthrough

CONTINUE ►

This is a real life thriller about a familys battle to save their son from a zero chance of survival diagnosis. With the worlds best doctors and the advocacy of his parents, Louis Unger would fight the battle for his young life. His grit and incredible attitude led to a breakthrough that would change how cancer is treated today. This is not a medical journal or a how-to guide. It is a true page-turner that gives you a front row seat to a miraculous story of courage, inspiration and determination. All proceeds from this book will go to the Carrot Seed Foundation where they will be used to fund Neuroblastoma clinical trials and support the children and families who are stricken by this disease.
