

## [GET] Living Forest, The

CONTINUE ►

From the leaves and branches of the canopy to the roots and soil of the understory, the forest is a complex, interconnected ecosystem filled with plants, birds, mammals, insects, and fungi. Some of it is easily discovered, but many parts remain difficult or impossible for the human eye to see. Until now. *The Living Forest* is a visual journey that immerses you deep into the woods. The wide-ranging photography by Robert Llewellyn celebrates the small and the large, the living and the dead, and the seen and the unseen. You'll discover close-up images of owls, hawks, and turtles; aerial photographs that show herons in flight; and time-lapse imagery that reveals the slow change of leaves. In an ideal blend of art and scholarship, the 300 awe-inspiring photographs are supported by lyrical essays from Joan Maloof detailing the science behind the wonder.
