CONTINUE ►

This book contains the virtual lab setup guide and the lab exercises for installing and configuring Windows Server 2016. You can create the virtual lab infrastructure on your own system and you can easily perform all the lab exercises mentioned in this book. Candidate having the basic knowledge of Windows operating systems and networking fundamentals can perform all the lab exercises without (or least) the need of a trainer or faculty. This book mainly covers the initial implementation and configuration of core services, such as AD DS, networking services. This book contains the following step by step lab exercises: What's New in Windows Server 2016? What's new in Windows Server 2016 Hyper-V? What's new in DNS in Windows Server 2016?
