Discover the optimum time to plant, fertilize, cultivate & fish to maximize your success. Moon gardening is based on the moon's gravitational effect on soil & plant moisture (sap) and to a lesser extent, on the effect of moonlight. Follow the moon cycles to optimize your results. Seeds swell & germinate sooner; plants are stronger & harvests are better. A concise & practical guide for all plants. Calendar never goes out of date = sustainable & cheaper. Long lasting + easy to wipe clean. Works in any climate, anywhere in the world. Easy-to-follow directions. Includes companion planting tips as a bonus! The full-colour A4-size calendar divides the 28-day lunar cycle into 6 periods of various lengths for different activities. Simply align the new moon symbol on the rotating wheel with the date of the new moon each month & follow the recommended activities each day of the month. You'll find the optimum times for sowing above + below ground crops, preparing soil, transplanting, pruning, fertilizing, weeding, harvesting & even fishing! A gift for any gardener. CUSTOMER FEEDBACK: Michelle V, US: "I have the Moon Calendar and it's amazing! Extremely easy to use and follow without all the fuss

of the other moon calendars. I tried it for the first time this fall and was thrilled with the outcome. In Texas you get two planting seasons. Much more produce than I've ever had." Lee M, AU: "I used to think gardening by a moon calendar was a little bit like astrology or numerology. Just a stretch too far. So I set out to prove it to myself. A single clove of garlic, split into two piles of cloves. The first lot planted when the mood took me. The second two and a bit weeks later and according to the moon calendar. The second lot shot up like there's no tomorrow. The first lot have never appeared. I become happier with the results every day." Trish McGill, AU: "I have been using the moon phases to garden for some time but had never seen such a fantastic compact and perpetual product."
