Lovely Amelia Travels "Lovely Amelia Travels" is a children's book series written by former Private Nanny Stephany Salazar Nelson. Inspired by the children Stephany cared for in her 14-year career, she creates the character of a school age girl named Amelia. Amelia travels around the world to exciting and beautiful destinations that Stephany, herself, was able to observe during her career. While the series is a dedication to these children, the storybooks are also stimulated by the travels of the children themselves. About the character, Amelia is a sweet, loving, curious and adventurous little girl. She loves to teach and tell other children about the cities and countries she visits. She likes trying new foods and loves learning new languages. She makes new friends with each unique adventure and absolutely loves the indigenous animals she meets along the way. Through the pages of her cute little journal, Amelia gives us an exciting point of view while traveling with her parents on their exciting adventures. Parents reading to/Children who read this series of books instill foundational awareness of:
