In this groundbreaking portrait of corporate seizure of political power, *We the Corporations* reveals how American businesses won equal rights and transformed the Constitution to serve the ends of capital. Corporations - like minorities and women - have had a civil rights movement of their own and now possess nearly all the same rights as ordinary people. Uncovering the deep historical roots of *Citizens United*, Adam Winkler shows how that controversial 2010 Supreme Court decision was the capstone of a 200-year battle over corporate personhood and constitutional protections for business. Bringing to resounding life the legendary lawyers and justices involved in the corporate rights movement - among them Daniel Webster, Roger Taney, Lewis Powell, and even Thurgood Marshall - Winkler's tour de force exposes how the nation's most powerful corporations gained our most fundamental rights and turned the Constitution into a bulwark against the regulation of big business.
