Are you Afraid of Growing Older or Ending up in a Nursing Home? Your medical choices and end of life decisions not followed? Having trouble discussing these important decisions with your family. Is there no one to help you that you trust? Your money or your life? Everyone in my family trusted the people in the system to take care of Rose . . . But the hospital staff, the doctors, the nurses, and those running the "skilled" nursing facility didn't seem to care at all in the end...Aging in America: A Cautionary Tale of Wrongful Death in Elder Care by Karol Charles is a narrative written by a daughter about the wrongful death of her mother, Rose. Through her heart-wrenching story describing the end of Rose's life and the cover-up that ensued, Charles helps readers prepare and protect themselves and those they love as they grow older by offering prescriptive advice and providing easy-to-understand sample legal documents for estate planning, financial and medical care.. Aging in America also includes valuable information about elder abuse, how mistakes are made resulting in wrongful death, and failures in the legal system to punish those responsible so that readers can better protect their loved ones and themselves. The End of Life should be full of care and compassion - not tragedy. Being old doesn't mean you have to die. This book is for everyone. Lay persons, elder law lawyers and medical professionals. There is something in the book that each person can learn from, no matter how experienced. Mistakes were made by all the professionals in this story. As a result, a person died and justice was not served. Who is responsible? How did they get away with it? Elder Abuse attacks your most important assets: Your Life; Your Emotional & Physical Well Being; and Your Financial Assets. You will be shocked to discover that very few people care about you.
