## [GET] Gotti and Storm: Falling for A Trill A\$\$ Gangsta

Getting it out the mud is a quote that many live by, but Gotti was the definition. He's a man of many talents, but life never gave him the privilege to explore them. Instead, life granted him the short end of the stick and expected him to turn water into wine. An unforgettable night changes his life, but the change doesn't come easy. There's no doubt that Gotti's life is a hell storm brewing, but what's a little rain when you can sell water to a well? Unlike her name, Storm is an ambitious, independent, woman with a bright future ahead of her. The struggles of trying to keep her family together and afloat weigh heavy on her shoulders, but she wears the burden with pride. A run-in with death puts life in perspective and gives her a sense of clarity. When she meets Gotti, that clarity becomes foggy. Instead of running for the hills she embraces the crazy that becomes her life and hopes that it's exactly what she needs. Because we fear the unknown, we tend to color within the lines. The same could be said about our hearts. We love the ones who are deemed safe because the outcome is predictable. What we forget is the love that's worth having is the one that's least expected. Gotti and Storm both have a lot to learn about life, themselves, and each other. The beauty in it all is, getting it through the mud and walking through the storm just to find the way to each other's heart.
